

**'Our range of Professional Services Automation and Expense Management solutions deliver significant and immediate operational benefits to organisations. Our software increases productivity, improves cash flow, reduces costs and ensures legislative compliance'**

time@work

**'Expanding businesses require flexible, scalable and robust solutions. We offer world-class analytical functionality with a low footprint and industry standard XML based integration.'**

### About Us

systems@work is a leading European provider of Professional Services Automation and Expense Management solutions.

We have extensive experience of designing, implementing and supporting systems which address the needs of organisations wishing to improve their business processes.

Our solutions are deployed in organisations across the UK, Europe, North America and Asia and we specialise on implementing systems which achieve an ROI of less than 6 months.

To learn more about how we can assist your organisation please visit our website at [www.systems@work.co.uk](http://www.systems@work.co.uk), email us on [info@systems@work.co.uk](mailto:info@systems@work.co.uk) or phone on +44 (870) 760 5552.

### time@work

When time is critical to your organisation, time@work provides the processes and management information necessary to run your business.

Whether you operate in a single country or globally, in one language or in many, in one currency or in multiple currencies, time@work can integrate your processes and bring you the benefit of complete control.

Our range of fully integrated modules enables organisations to improve utilisation and cash flow, reduce the billing cycle and enhance management visibility and control.

Core modules include:

- Time and Expense Entry
- Billing
- Budgeting/Forecasting
- Resource Planning
- Project Management
- Management Reporting

'Recent legislative changes necessitate the adoption of robust expense management & billing solutions as the cornerstone of good corporate governance. Our solutions provide the most flexible, scalable, and technologically advanced functionality available'

'expense@work produces management information which enables organisations to understand and control employee expenditure and ensures that expenses receive the correct VAT and Taxation treatment.'

## expense@work

Most organisations have hundreds or thousands of personal expenses every month.

The cost of completing, authorising, reconciling, re-checking, adjusting VAT and re-keying the data is inefficient and prone to error.

expense@work is a highly robust international expense management solution which can be rapidly deployed to ensure adherence with corporate guidelines and Inland Revenue and VAT rules.

expense@work is easy to use and accommodates VAT, P11D, multi-currency, corporate credit cards and cash advances.

Using workflow rules, expenses are routed to managers for authorisation and the system applies checks and guides to eliminate errors.

## Consultancy

At systems@work, we recognise that the most important aspect of any solution is the team of consultants tasked with managing the implementation and the after sales support available once the project is completed. At the heart of our

offering is a group of experienced and highly skilled application specialists and systems architects who are responsible for delivering our solutions on time and within budget.
